

UNBREAKABLE COLLECTION

By Neo Cross Continental

2026

Catalogue

Foreword

At Neo Cross Continental, we believe that hospitality is about creating moments - experiences shaped by every detail guests interact with. These items are touched, held, and trusted every day, and they must perform flawlessly, even in the most challenging surroundings. That is exactly what we stand for, and what we refine day by day - which is why we take such pride in our Unbreakable Collection.

2026 embodies durability, responsibility, and design - presenting glassware and tableware that unite refined aesthetics with uncompromising performance.

As partners to the premium hospitality sector on land, at sea, and in the air, we understand the realities of professional service. Our mission is to create products that not only elevate the guest experience but also contribute meaningfully to a more sustainable future.

This new edition marks a significant step forward: the introduction of our next-generation unbreakable material, BPA-free and recyclable, achieving an unparalleled CO₂ footprint over its lifecycle - all while preserving the clarity and brilliance of traditional glass - available for selected items.

Every piece in this collection reflects our ongoing commitment to sustainability, reliability, and timeless design.

Sustainability

German Brand. Made For A Sustainable Future.

At Neo Cross Continental, sustainability is not an afterthought - it is a guiding principle that shapes every aspect of our work. For the Unbreakable Collection 2026, this means creating tableware that combines timeless design, exceptional performance, and environmental responsibility. In professional settings, from busy hotel restaurants to yachts, resorts, and aviation service, the ability to withstand challenging conditions is the foundation of both reliability and sustainability.

Selected collection items can be made from our next-generation unbreakable material, which is BPA-free, recyclable, and engineered to have a lower lifecycle CO₂ footprint than other glass alternatives, including some conventional glassware.

The sustainability of this material is grounded in practical realities. By remaining unbroken even under high-traffic and high-risk conditions, it drastically reduces waste, as pieces do not need to be replaced frequently. Fewer replacements mean fewer production cycles, less energy consumption, and lower transportation requirements. Its ability to endure thousands of professional wash cycles ensures that it maintains its appearance and performance over years of intensive use. Every detail - from its resistance to impact and thermal shocks to its lightweight and safe handling - has been designed with real-world hospitality challenges in mind, making it a product that is both reliable for operators and responsible for the environment.

Through thoughtful design and material innovation, the Unbreakable Collection demonstrates that true sustainability is achieved when beauty, function, and longevity coexist.

Because sustainability is not a trend - it's a choice.

BPA-Free & Built for the Future

Safe. Durable. Environmentally Friendly.

At Neo Cross Continental, we are stepping into a future where unbreakable glassware is the standard – completely safe for food and beverages, environmentally responsible, and engineered to last. Items in the Unbreakable Collection have a BPA-free option, are recyclable, and designed to withstand the demands of high-traffic hospitality environments, reducing waste and supporting a more sustainable way of working.

Neo Cross Continental Means First Class

Dynamic Collaboration

We build close, agile partnerships, planning ahead and staying connected through direct contact to drive growth together with a personal touch.

THE Glass Alternative

After testing products around the world, we picked our headline collection – Unbreakable Collection – that offers all glass alternative needs.

Sustainability

Thoughtful materials, lasting design, a sustainable approach at every step.

Individual Procurement – Tailored to You

From unbreakable and regular glassware to kitchenware, cutlery and more, we craft the offering to your hospitality needs with access to over 15,000 products.

Crafted for Professionals

Performance Where It Matters Most

The professional hospitality environment is demanding, fast-paced, and unpredictable. Our products are designed to withstand challenging conditions - from heavy daily use to high-pressure service moments - without compromising performance. The *Unbreakable Collection* is built for operators who need reliability at every table, in every setting.

Our glassware and tableware are trusted across hotels and resorts, beach, pool, and spa areas, clubs, arenas, caterers, cruises and yachts, as well as airlines and private aviation. Wherever guests gather, our products combine elegance with durability, ensuring safety, ease of service, and a premium experience every time.

Brand Support

Beyond performance, the *Unbreakable Products*, especially Core Collection, is highly customizable to meet the unique needs of each operator.

From 500 pieces, we can apply one- or multi-color prints.

From 500 pieces, certain eligible glasses can receive calibration marks (Eichstrich).

From 1,000 pieces, we can manufacture all glasses in the color of your choice, allowing you to match brand colors, themes, or interior concepts seamlessly.

Unbreakable Aesthetics

The *Unbreakable Collection* is designed to harmonize strength with refined aesthetics.

Every curve, edge, and surface was carefully considered to reflect the elegance of traditional glass. Its clean, polished lines, and balanced proportions allow each piece to complement any table setting, while subtle details enhance visual appeal, grip, and handling.

Simply incomparable.

BPA - Free Options

Premium unbreakable glassware with an elegant stripe design that resists scratches and wear. Crafted for demanding professional environments, **Prime** combines design, feel, and durability, making it the first choice for luxury hotels, yachts, resorts, and aviation services.

Care & Maintenance Guidelines

(Unbreakable Glassware)

To ensure that your *Unbreakable* Products retain their durability, clarity, and premium appearance for years to come, please follow the care instructions below. They can be cleaned like traditional glassware, either by hand or in commercial or industrial dishwashers – with just a few important differences to ensure long-lasting performance.

Before First Use

- Rinse all products with hot water and a mild glass cleaner.
- Use microfiber cloths for polishing to avoid scratching.

Hand Wash

- Use a microfiber sponge, soft dish brush, or cloth.
- Stubborn stains or minor scratches can be treated with the rough side of a microfiber sponge under running water.
- For best results in removing lipstick or similar residues, use a microfiber cloth.

Maschine Wash

- Dishwasher or industrial dishwashing is possible and recommended.
- Use odorless, plastic-friendly detergents with protective components for material and decoration.
 - o Recommended dosage: 0.5 - 2.5 g/l depending on water hardness, temperature, soil level and specific detergent.
- For optimal drying, use a plastic rinse aid dosed at approx. 0.4 g/l.
- Recommended wash temperatures: 60°C to 70°C

Water Quality & Drying

- Areas with hard water, lime deposits, and mineral salts may cause cloudiness or spotting. A water treatment system (e.g., partial demineralization or reverse osmosis) is strongly recommended to avoid manual polishing.
- No repolishing required if correct rinse aid and water quality are used.
- Avoid fan heaters for drying.
- For improved drying performance, specific dishwashing parameters for plastics are ideal.

Please Avoid

The following may shorten the lifespan or impair the clarity of your *Unbreakable* Products:

- Overdosing rinse aid.
- Undetected leaks in osmosis systems.
- Detergents with metal protection agents.
- Use of the wrong dishwasher type or settings.
- Abrasive cloths, sponges, or polishing tools that cause scratches.
- Residue from dairy products if not rinsed with hot soapy water.
- Use of abrasive powders, steel wool, razor blades, or sharp tools.
- Contact with solvents, gasoline, esters, or aggressive cleaners.
- Mixing of liquid ecstasy (GHB/GBL) - this can result in permanent white spots and streaks.
- Stacking items not designed to be stacked.
- Sand or debris between stacked glasses.
- Exposure to open flame or cigarettes.

By following these care guidelines, you'll maintain the flawless appearance and premium quality of your *Unbreakable* Products - allowing them to meet the highest standards of hospitality use over time.
